NOTICE OF OFFICE ACTION RECEIVAL

Dear Examiner Natnithithadha,

Your kind and professional way of providing the important information concerning my patent application under the Petition to Make Special Due to Illness was received yesterday, after returning to the site of the devastation done by hurricane Frances, so please forgive any delay in promptly responding. I can detect the consideration you have taken to help me see what necessary actions to take, in order to properly submit the next format. You obviously took special care to show me in detail, how to correctly submit each segment required by your office. Thank you.

Upon your suggestion, (and being that I am presently in such debt, due to hospital bills etc.), I am going to sell everything I can to acquire the finances to obtain a Patent Attorney and while doing so, I am buying the book "How to Patent It Yourself". With your permission I would like to send you drafts of what I feel I can accomplish for your review if acceptable. If I show any promise to your satisfaction, and perhaps with your help, I can save some money for the attorney costs. Kindly provide a fax number should this be acceptable.

Please be aware that I understand the "liability", of not properly handling *something* as important as this, due to my present unfamiliarity, as described on page 13, section 12 of your OFFICE ACTION SUMMARY. With this in mind, I will be doing everything in my power to secure the services of a registered patent attorney, as I am basing all that I have on the possibility, that my present invention will provide an opportunity that my family may benefit. This is the most important consideration I am taking at this time, or have taken in my life!

I have worked for years on this project, due to the fact that the Incentive Spirometer is a device I have been required to use many times personally. I can see how the prompting aspect of my invention could be truly helpful to others. Acquiring an attorney to work on the necessary format and proof of its novel ability to provide electronic measurement in a new way, as well as, allowable corrections which show uniqueness, (without changing the function of the present invention), I am of hope and belief that my new invention is worthy of being granted a United States Patent and will be working on providing you with whatever is necessary to fulfill the described requirements you have formatted.

I am aware that you were the Assistant Examiner on other projects that relate to the Incentive Spirometer and I know that you have obviously moved up in the position you presently possess, so I feel extremely fortunate to have someone of your caliber and qualifications working with me.

Again, thank you in advance for your help and please do not hesitate to call me should you need me to do anything to expedite the necessary procedures you require.

Sincerely,

T.K. Bryant
